

September, 2014

Dear Candidate

The Connecticut Health Foundation (CT Health) is the state's largest independent health philanthropy dedicated to improving lives through a systems change approach. Since it was established in 1999, the foundation has granted \$54 million to nonprofit organizations and public entities throughout the state to expand health equity, promote children's mental health early identification and intervention, and increase access to oral care for low income families.

CT Health has recognized the tremendous opportunity for building a better, healthier Connecticut through the landmark reforms written into the Affordable Care Act (ACA). As Connecticut has led the nation in the implementation of health reform, CT Health has been pleased to support several of the state's key initiatives:

- Access Health CT's navigator program in Fairfield, Hartford, and New Haven counties, which provided in-person enrollment help so people could understand insurance and financial assistance options
- Formative consultation for Access Health Analytics, the state's all payer claims database
- Consultation for the Department of Children and Families Behavioral Health Plan for the State of Connecticut (PA 13-178), which will be issued in October

As was announced recently, Connecticut's enrollment efforts have been so successful that the uninsured rate was cut in half. Now that over 250,000 residents have quality, affordable health insurance, they have a fair shot at taking ownership of their health.

Having healthcare coverage is an important first step in improving the health and wellbeing of Connecticut residents. Thanks to the ACA:

- No one can be denied coverage due to a pre-existing condition
- Children can stay on their parents' insurance until the age of 26
- Women pay the same rate as men for their health insurance premiums
- Preventative services, like physicals and mammograms, are covered at no cost to the consumer

And we cannot go back. We cannot go back to a time when consumers could be denied coverage, and when consumers would, due to cost, delay care until it was too late.

We have much more to do to ensure health equity for every Connecticut resident and CT Health is committed to continuing to transform healthcare to be more affordable, of higher quality, and more responsive to the people who need it.

In this candidate briefing packet, you will find:

- The **organizations CT Health has grant funded**. We would be pleased to discuss the health needs and opportunities you see in your community at any time.
- Health **access data by town** so that you can look up information pertinent to the people of your district
- A visualization of CT Health's approach to ensuring all people in Connecticut gain more access to better health care, including integrated physical, mental, and oral health
- One of the foundation's health reform **policy briefs, including an infographic**. CT Health commissioned this brief from the Urban Institute. The foundation believes that rigorous policy research should inform policy making.

As both a funder and health reform expert, we hope that you will consider CT Health a resource. Please do not hesitate to contact us at 860.724.1580 or [pat@cthealth.org](mailto:pat@cthealth.org) or [elizabeth@cthealth.org](mailto:elizabeth@cthealth.org). You can find us online at [www.cthealth.org](http://www.cthealth.org) or on Twitter @cthealth.

Sincerely,

Patricia Baker  
President & CEO

Elizabeth M. S. Krause
