YOUNG ADULTS

Covering Connecticut
The effects of the Affordable Care Act on state residents

DEMOGRAPHIC OVERVIEW: Adults under 35

733,000
total young adults ages 18-35

85,000
uninsured, 2017

149,000
would be uninsured without the ACA

65,000 young adults are covered because of the ACA

• An estimated 85,000 adults under 35 are uninsured in Connecticut in 2017. Without the ACA, the number of uninsured would be 149,000.

• The uninsured rate among young adults is 12%. Without the ACA, it would be 20%.

Young adults in Connecticut would be disproportionately affected by a repeal of the ACA or major cuts to the coverage it provides.

• An additional 9% of young adults – nearly one in 10 – would become uninsured without the ACA. Among all residents under 65, the rate is 5.4%.

• 59% of young adults have employer-sponsored insurance, compared to 67% of adults ages 35 to 64. As a result, young adults are more vulnerable to changes to Medicaid or the individual insurance market – the two types of coverage most affected by the health law.

Source: Urban Institute analysis, Health Insurance Policy Simulation Model 2017. Note: Components may not add because of rounding. For example, rounded to the nearest 100, the numbers of young adults who have coverage through the individual market with and without the ACA are respectively 39,200 and 35,300. Accordingly, the ACA is responsible for an 11% higher proportion of young adults who receive individual coverage.

* Other coverage includes military coverage, Veterans Health Administration coverage, and Medicare for people under age 65.

** Numbers are not shown due to small sample size.

This analysis compares estimates of health care coverage in 2017 with the Affordable Care Act (ACA) and without it. Numbers are rounded to the nearest thousand.

New safeguards and benefits for young adults with private insurance

Under the ACA, people with employer-sponsored coverage:

- Are protected from catastrophic medical costs because insurers can no longer impose annual or lifetime coverage limits
- Receive coverage of preventive services — including check-ups for babies, children, and adults; cancer screenings; and contraception — without copayments, deductibles, or other out-of-pocket costs
- Can immediately obtain coverage through Medicaid or Access Health CT if they lose their job-based coverage

These protections benefit the 430,000 young adults — 59% of adults under 35 — who have employer-sponsored insurance.

In addition to those protections, people who buy insurance through the individual market:

- Cannot be denied coverage or charged more if they have pre-existing conditions
- Are guaranteed coverage of all “essential health benefits,” including treatment of mental health and substance use disorders, prescription drugs, and maternity care
- May qualify for financial assistance to lower their premiums and out-of-pocket cost-sharing on plans offered through Access Health CT, depending on their income

These protections benefit the 39,000 young adults — 5% of adults under 35 — who buy coverage through the state’s individual market.

An additional 9% of young adults — nearly one in 10 — would become uninsured without the ACA.
