

HEALTH DISPARITIES IN CONNECTICUT DIABETES

Not everybody has the same opportunities to be as healthy as possible. Some groups are disproportionately affected by social, economic, and environmental challenges that can make it harder to access health care and other resources needed for good health. The results are disparities in health outcomes.

DIAGNOSES

Black Connecticut residents are 50% more likely than white residents to have been diagnosed with diabetes.

Adults with diabetes, Connecticut, 2021 ¹

DEATHS FROM DIABETES

Black Connecticut residents are significantly more likely than white residents to die from diabetes.

Diabetes deaths per 100,000 people, Connecticut, 2021 ²

Diabetes death rates do not capture the full toll of the condition, because many people die from complications of diabetes. Another important indicator is the rate of diabetes-related deaths, which refers to deaths in which diabetes is a contributing cause of death.

Diabetes-related deaths per 100,000 people, Connecticut, 2021 ²

Race/ethnicity	Black	Hispanic	White	Another race
Rate	94.2	69.0	39.2	29.6

AMPUTATIONS FROM DIABETES

One serious consequence of diabetes is having a leg or foot amputated – a preventable complication that experts say should be unnecessary.

Yet it continues to occur, disproportionately among Black and Hispanic individuals.

Black Connecticut residents are four times as likely as white residents to have a diabetes-related lower-extremity amputation.

Among Hispanic residents, the rate is nearly three times higher than among white residents.

Diabetes-related, nontraumatic lower-extremity amputations per 100,000 people, Connecticut, 2021³

HOSPITALIZATIONS FROM DIABETES

Black Connecticut residents are nearly four times more likely to be hospitalized for diabetes than white residents, while Hispanic residents are more than twice as likely.

Hospitalizations, per 100,000 people, Connecticut, 2021³

Race	First-listed diagnosis	Any diagnosis
Black	406.0	3,380.7
Hispanic	267.9	2,909.7
White	108.4	1,262.3
Other	80.9	1,375.9

ABOUT THE DATA

- All data is age-adjusted
- White, Black, and other categories include only those who did not identify as Hispanic
